UK SOCK SIZE	EURO SOCK SIZE
9-11	25-29
12-2	30-35
3-6	36-40
7-12	41-47

CHOOSE THE RIGHT SIZE

Tops: If your height suggests a different size to your chest measurement it is better to follow the chest measurement for the best fit.
If your body measurements fall between two sizes you could order the lower size if you prefer a tighter fit, or the higher size for a looser fit.

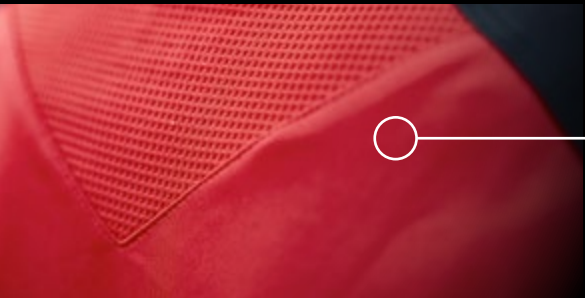

CHEST
Measure around the fullest area of the chest with a flexible tape measure, holding the tape measure horizontal

WAIST
Measure around the narrowest part of the waist, keeping the tape measure horizontal.

BALL SIZE	AGE RECOMMENDATION
SIZE 1 / MINI	0 - 36 MONTHS
SIZE 2 / MIDI	3 - 6 YEARS
SIZE 3	6 - 9 YEARS
SIZE 4	9 - 14 YEARS
SIZE 5	14+ YEARS

GUARD SIZE	HEIGHT RECOMMENDATION
X SMALL (XS)	UNDER 120CM
SMALL (S)	120 - 140CM
MEDIUM (M)	140 - 160CM
LARGE (L)	160 - 180CM
X LARGE (XL)	180 - 200CM

TECHNOLOGIES

PROFLOW

MOISTURE CONTROL

ProFlow is a breathable performance fabric designed to wick sweat away from the body. Engineered to keep you dry and comfortable in high intensity situations, the technology focuses on helping you to perform at your peak, for longer, through every training drill and match you face.

PROSHIELD

ALL-WEATHER PROTECTION

ProShield is a weatherproof performance fabric engineered to shield you from the elements. Designed to keep you warm and dry in the toughest training conditions, ProShield technology delivers superior protection when you need it most.

hyperseam

With the accuracy, speed and power of a stitched football, and the control and consistency of a bonded football, Mitre's innovative Hyperseam technology delivers a ball that plays better, lasts longer, and moves faster.

Hyperseam. In-play consistency. Low maintenance. High durability.

AIRCELL

AirCell is a totally breathable, ultra lightweight guard technology. Designed for use at all levels of the game, it keeps the leg cool, while also delivering the protection you need. Professional quality. Total breathability.

MOMENTUM JERSEY

The contrast jersey,
with piping detail.

Constructed from 100% polyester diamond texture material, drawing sweat away from the skin to keep you dry and comfortable.

Textured material combined with closed mesh contrast detail gives this style a retro feel.

Prostar improved slimmer fit with raglan sleeves gives increased freedom of movement.

FREE SHORT SLEEVING!

AVELLINO JERSEY

The traditional
striped jersey.

Constructed from 100% polyester premium sublimated interlock material, drawing sweat away from the skin to keep you dry and comfortable.

Ergonomically designed for comfort and durability, with plain back panel for printing and lower back mesh panel for breathability.

One of our most popular jerseys with a classic bold vertical stripe design.

GEO-T/ MARINO

BASE LAYERS

The comfortable addition for training and matchplay

Constructed from 93% polyester, 7% elastane jersey - moisture is drawn away from the skin leaving the wearer dry and comfortable.

High stretch, dense and durable fabric ensures a tight but comfortable fit with high neck for added warmth.

GEO-T TOP

Raglan sleeves increase freedom of movement and flatlock seams reduce friction.

MARINO SHORT

No side seams on short means that friction is kept to a minimum.

mitre®

THE FUTURE OF FOOTBALL HAS ARRIVED

The Delta Hyperseam is the newest and fastest addition to our professional ball range, and the match ball of the Football League.

At the heart of the ball's market-leading speed and accuracy is a 12 panel design, Mitre's revolutionary configuration that delivers greater energy transfer than ever before, and makes the Mitre Delta Hyperseam our fastest, most efficient and aerodynamic ball yet.

In addition to Mitre's unique 12 panel construction, the ball also has an optimised graphic that helps players to see it faster, from greater distance.

The Delta Hyperseam features Mitre's innovative Hyperseam technology, engineered to deliver in-play consistency, low maintenance, and high durability. The future of football has arrived.

MEETING RETAIL GOALS

The Delta Hyperseam ball graphic is great news for retailers, providing high visibility on-shelf for enhanced impact.

PRODUCT FEATURES

- 1 - The official match ball of the Football League
- 2 - High impact graphic that allows you to see the ball quicker, easier and at faster speeds
- 3 - Revolutionary 12 panel professional football, featuring Hyperseam technology – developed and tested with professionals in mind

WORLDWIDE AFFILIATIONS

BALL TECHNOLOGY FOR CONTROL FREAKS

Imagine the powerful, accurate, speedy performance of a stitched ball, combined with the sturdy, consistent feel of a bonded ball.

Mitre delivers this by fusing both construction methods into one. Hyperseam's panels are joined together with high-tension machine stitches and PU sealed seams. The result is a ball that plays better, lasts longer, and moves faster.

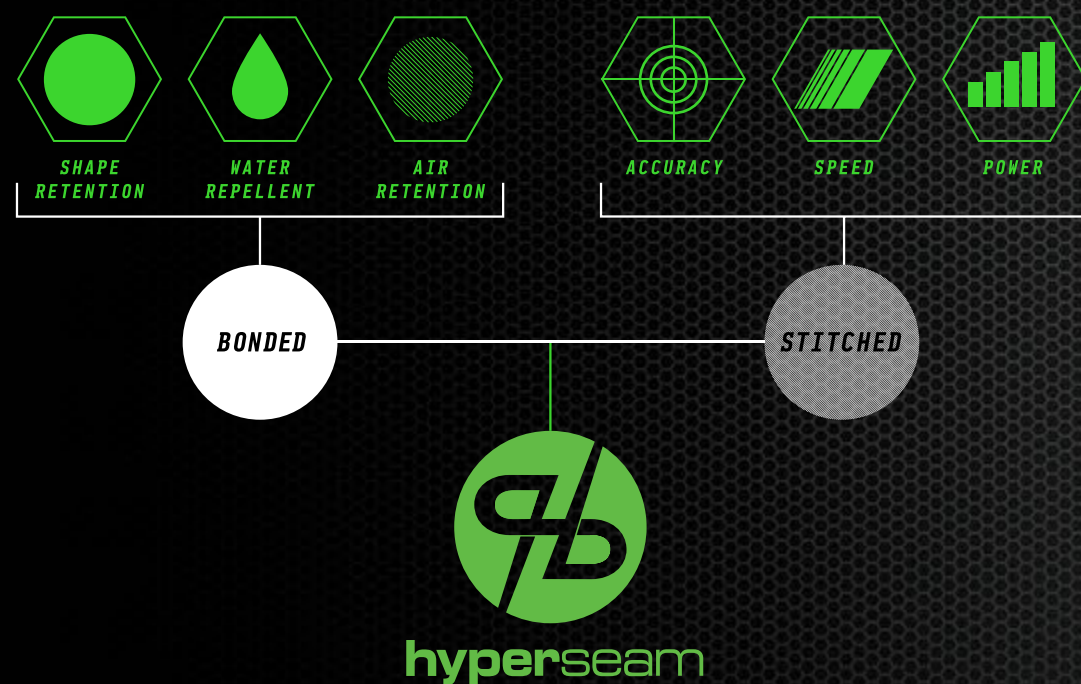

THE HYPERSEAM RANGE

- **Highly accurate.** Reduced resonance when striking for better in-flight accuracy
- **Fast and powerful.** Increased outer tension to increase speed off the foot
- **Easy control.** 5mm foam backing for increased contact time on impact
- **Water repellent.** Fully sealed seam ensuring almost zero water uptake

- **Air retaining.** Butyl bladder requires less re-inflation than a latex bladder
- **Consistent feel and performance.** Touch and shape stays the same in all temperature conditions
- **Shape retaining.** Engineered to guarantee consistent size and shape retention

MEETING RETAIL GOALS

Your consumers want innovative products that look good; the ground-breaking Hyperseam range looks great both on the shelf and on the pitch.

DELTA HYPERSEAM
PROFESSIONAL

BALL USAGE &
SUITABILITY

BALL CARE AND PRESSURE

Care should be taken when inserting the inflation needle into the ball to prevent damaging the valve and bladder.

Mitre Glycerine should be used to allow the needle to be inserted smoothly. This is particularly important on initial inflation as the wall of the bladder can be punctured if the needle is pushed in too far before any air is pumped in.

The amount of pressure in a ball will significantly affect the performance and durability of the ball. Pressure should be checked regularly as not only do balls gradually lose air through the wall of the bladder, but temperature can also alter the pressure by 1 psi for every 10°C.

The recommended pressure is printed on the ball and this should be checked regularly with a Mitre pressure gauge.

If the ball gets wet during play, it should be dried in an airy place and not force dried with heat as this may damage the ball.

BALL QUALITY AND SUITABILITY

PROFESSIONAL

Designed to deliver performance and manufactured to highest and tightest specification. Developed with professional clubs throughout Europe, Mitre professional footballs deliver the ultimate in power, accuracy, consistency and control.

MATCH

Mitre match balls are designed for all ages to perform at the highest levels of the game week after week. That's why Mitre balls are used by more amateur clubs than any other brand. So whether you're a semi pro or a junior player, Mitre has a match ball to suit your game.

TRAINING

Developed to perform for hour after hour of rigorous training, Mitre training balls provide great playing characteristics with long-lasting durability and reliability.

RECREATIONAL

For the stars of the future, ideal for a kick-about in the park or a game of heads and volleys and other skills practice. Mitre recreational balls are specifically designed for fun and leisure. Check icon on ball for specific surface and weather usage.

DIFFERENT SURFACES

ASTRO TURF

There are many different types of Astro turf, from the pure synthetic fibre to filled fibre where fillings can vary from sand to ground rubber. All have one thing in common: they react with the ball like hard ground, increasing the bounce. Also many have much less drag/grip on the ball than natural turf. Because of this we normally recommend reduced ball pressure to 7-9 psi to slow down the ball and grain finish material to increase the drag.

A part worn shiny ball also gives this effect. Many artificial pitches are surrounded by fences and walls which can easily damage the ball so we highly recommend more economic balls to reduce the cost of replacing damaged balls.

SYNTHETIC SURFACES

Asphalt and treated concrete. Not all synthetic surfaces are Astro turf. On most, abrasion is the main problem and we have a range of economic training balls and high abrasion-resistant match balls which will cope with these surfaces.

SPORTS HALL

Wooden tiles, carpet and indoor pitches. All are dry so water absorption is not a problem, but the abrasiveness varies widely so it is important to consider this before recommending any particular ball. Some games have special requirements such as low or reduced rebound and Mitre has reduced rebound balls for Futsal, indoor and Futebol de Salão.

NATURAL TURF

Natural turf pitches vary enormously in different countries, different seasons and different levels of play. As well as performance level we need to consider abrasion, water absorption and required use before recommending balls for natural turf. If the ball is to be used for training only, then economy and durability are most important; if to be used for a match or match practice, then performance is more important.

SHINGUARD
TESTING

ALL EUROPEAN
GUARDS REQUIRE
THE CE MARK

Football is a contact sport and as such presents a number of hazards that cause injury. Shinguards cannot always prevent serious injury but are designed and developed to reduce the severity of abrasions and bruises to the player's shin.

In Europe, shinguards that claim to offer protection to the player are considered to be intermediate category personal protective equipment and as such shinguards must be tested and CE marked; shinguards are tested against the BS EN 13061:2009 Standard. This standard assesses the shinguards for a range of properties, including impact resistance, comfort and ergonomic fit.

The CE mark can be found on all Mitre shinguard labels, as well as the user information and product care leaflet.

ACCESSORIES

POLE SET
FITNESS

Set of 12 poles

CUSTOMISATION

PERSONALISED APPAREL - LETTERS & NUMBERS / BADGES / SPONSORS

We offer a state of the art customisation facility that allows you to personalise your purchase by adding numbers, sponsors and club badges to your kits, bags, bibs, gloves and footballs.

With screen printing and embroidery options available, as well as a bank of standard fonts to choose from, we can service almost all your customisation requirements, no matter how simple or complex.

Even if your club doesn't have its own club crest, we can help you create one with our selection of standard badges, helping you build a professional and co-ordinated image and creating an environment where your players feel part of a team.

LETTERS & NUMBERS

NUMBERS

Available in 22cm (9"), 10cm (4") and 5cm (2"). Heat applied
One colour: White, Black, Emerald, Navy, Royal, Scarlet, Yellow, Maroon, Sky

INITIALS

5cm (2") Heat applied
One colour: White, Black, Emerald, Navy, Royal, Scarlet, Yellow, Maroon, Sky

When ordering please specify the initials, garment size and number (if applicable).

NAMES TO JERSEY BACK

5cm (2") Heat applied
One colour: White, Black, Emerald, Navy, Royal, Scarlet, Yellow, Maroon, Sky

When ordering please specify the name, jersey size and number (if applicable) for each jersey. Curved lettering is more suitable for jerseys with raglan sleeves.

MITRE APPAREL LETTERS & NUMBERS

PRINT APPLICATION

When applying different badges and sponsors onto our products, we use a selection of application methods, chosen on complexity of art, or specification.

STRETCH PRINT

Highly recommended for most garments and bags. Unbeatable value and performance. Factory applied by PROSTAR and used successfully by Premier League and International teams. Durable prints giving a quality matt finish.

DIRECT PRINT

EMBROIDERY

We are happy to quote for your requirements whether you have an existing tape/disk for your badge or require your own design.

LOGO SIZE

We print logos to the Football Association recommended size. However in some cases where the style of the logo is too wide it may not be possible to print to the maximum size allowed. It may also not be possible to print full sized logos on smaller sizes of jerseys 24/26 to 32/34.

YOUR ARTWORK

When applying your bespoke artwork to your kit, the quality and type of artwork supplied will affect the accuracy of the reproduction and the speed of processing your order. When sending us your artwork please ensure it is saved in a layered vector format in a computer design package, ideally Adobe Illustrator. Please ensure that all text is converted to vector paths/curves as this help process your order efficiently.

Unless supplied in vector format, artwork may be required to be redrawn to ensures no loss of resolution when resizing for your order. For artwork supplied in the advised format, in AI, EPS or PDF, we do not apply an artwork charge. If artwork is supplied in a flattened or raster format such as JPG, BMP, TIF, an hourly artwork fee will be charged for turning the supplied artwork into a usable design.

IMPORTANT INFORMATION

When placing your order for custom printing, please ensure you have considered the following:

- Type of printing - Stretch Print or Direct Print
- Colour(s) of printing on garments, bags etc.
- Colour(s) of printing on goalkeeper clothing
- The possibility of an artwork charge if the quality is not suitable for reproduction
- Designs are resized to the maximum size permitted by F.A. regulations unless otherwise specified

GARMENT
AFTERCARE

TAKING CARE OF YOUR GARMENT & WASHING ADVICE

Our garments are made using high quality materials under strict quality control conditions. It should be noted that most fabrics discolour due to staining by substances such as mud and grass which may not be entirely removed by washing. We recommend removing as much mud from the garment as possible before soaking/washing.

Follow detergent manufacturers' instructions particularly with powders/liquids designed for heavy stains. Avoid products containing chlorine bleach that may damage fabrics, trims and decoratives.

Soaking garments in water and detergent as soon as possible can reduce discolouration. Use at least an equal amount of water by volume to that of the garments being soaked/washed. Make sure all parts are fully immersed. Pale garments such as White, Yellow, Sky and Tangerine may require more attention and the use of pre-wash soakers will assist in the removal of stains.

Do not overfill the washing machine with garments since if the ratio of water to garments is too small, dirt can easily be re-deposited. This can stain all the garments grey.

We do not recommend fabric conditioners on jerseys and shorts which may cause a build up of film on fibres. This can prevent the washing process from penetrating filaments and dislodging dirt. However, socks will benefit from fabric conditioners and softeners.

Prostar will not accept liability for discolouration or damage to garments which is attributable to staining caused by elements foreign to the materials used in manufacture.

CUSTOMISING YOUR GARMENT

Please check your order carefully before printing/embroidery as we are unable to exchange goods after customisation.

We will not accept responsibility for goods incorrectly supplied which are then printed or embroidered nor for goods incorrectly printed or embroidered by sources other than ourselves.

Many of our garments are manufactured using high quality sublimation print processes. Only trained operators should carry out any further process involving inks or heat.

We are unable to offer advice on the application of decorative products other than those it supplies and will not accept liability for any damage and/or discolouration attributable to decorative products applied by others.

PRODUCT CARE INSTRUCTIONS

SHINGUARD CARE INSTRUCTIONS

Mitre shinguards should be wiped clean using lukewarm water and be allowed to dry naturally at room temperature. In order to prevent damage to the shinguard, do not place on hot surfaces such as radiators.

GOALKEEPER GLOVE CARE INSTRUCTIONS

The latex rubber used to manufacture Mitre gloves is of the finest quality giving optimum performance in both wet and dry conditions. Please take great care as due to the soft nature of the material, we cannot guarantee protection against high and sustained abrasion.

To ensure the best grip, latex should be washed in warm water prior to first use. Never use detergents or soaps and never use water above 30°C.

All latex palms should be moistened with clean, warm water before each use.

Hang gloves individually. Do not dry gloves in direct heat or near radiators.

BALL CARE INSTRUCTIONS

INFLATION

Care should be taken when inserting the inflation needle into the ball to prevent damaging the valve and bladder. Mitre Glycerine should be used to allow the needle to be inserted smoothly. This is particularly important on the initial inflation as the wall of the bladder can be punctured if the needle is pushed too far before the air is pumped in.

PRESSURE

The amount of pressure in the ball will significantly affect the performance and durability of the ball. Pressure should be checked regularly as not only do balls gradually lose air through the wall of the bladder, but temperature can also alter the pressure by 1 psi for every 10°C.

The recommended pressure is printed on the ball and this should be checked regularly using a Mitre pressure gauge. Do not exceed the recommended pressure, this may damage the ball and its performance.

AFTERCARE

If the ball gets wet during play, it should be dried in an airy place and not force dried with heat as this will damage the ball.
